Our aeration module is a convenient way to easily increase air handling capacity and can be installed quickly and conveniently. The modules are designed to retrofit existing tube or disc units that are no longer providing optimal aeration performance.

- Available in 12, 16, or 20 diffuser unit assemblies
- For current or planned surface aerators
- Energy savings (50-70%) for similar pounds of Oxygen
Floating Laterals

Made of heavy wall, high density polyethylene pipe (HDPE) designed to float on liquid surface & supply air to aeration diffusers

- Extremely cost-effective
- Reliable air supply
- Ideal for ponds & lagoons
- Low capital, install, and maintenance costs
